

**PROFESSIONAL ENGINEERS IN CALIFORNIA GOVERNMENT  
2021 - 2022 GOLDEN GATE SECTION ELECTION  
Candidate Statements**

**Director: Paul Penney**

I've been a Utilities Engineer with the California Public Utilities Commission for going on 22 years, and have been a PECG member since I came to the Commission. I've had the privilege of serving as your Director for seven of the last eight years, and prior to that I served as the VP for Rank and File for six years.

During my time as your director, I have learned a great deal about the issues that continually confront PECG members, and believe that constant vigilance is required to ensure the interests of the members are protected and advanced. For instance, a past Golden Gate Section board member ignored the Golden Gate Section bylaws time after time to serve his own interests. That board member ignored the requirement to report the results of the yearly election to the Golden Gate Section members on more than one occasion. It was only after I protested this blatant non-action to follow the Golden Gate Section bylaws to PECG corporate that he finally reported the election results.

If elected Director, I will continue to work diligently to represent the interests of not only the Golden Gate Section membership, but the PECG organization as a whole.
