PECG STATEMENT ON GOVERNOR'S STATE OF THE STATE ADDRESS

SACRAMENTO, Calif. – Professional Engineers in California Government (PECG) released the following statement in response to Governor Brown's State of the State address:

“Professional Engineers in California Government commends Governor Brown for proposing solutions to the critical issues facing California,” said PECG President Steve Lee. “We support the need to address the future of the state's highway system and transportation funding. We commend the Governor's bold vision for California to continue to lead the way on climate change, greenhouse gas emissions reductions, and increased use of renewable energy. As California continues to grow and expand its transportation, water, and other infrastructure, it's important to remember the critical public safety role that state-employed engineers and other public servants fulfill in the success of these projects.”
