Member, American Geophysical Union
Member, Groundwater Resources Association
Volunteer, Bay Area Science Festival
Volunteer, Asian Pacific Environmental Network

I am excited to run for the position of Vice President Rank & File on the PECG Golden Gate Section Board. As an Engineering Geologist at the Regional Water Board and dedicated PECG member since 2017, I have actively served our section in various capacities, including President, VP Rank & File, Secretary, and leading the Professional Development Committee.

It was a privilege to represent the PECG Golden Gate Section as President last year and I believe we made great strides in shaping a stronger and more inclusive community. I am proud of the many accomplishments of members to successfully organize student outreach, professional licensing resources, public speaking skills training, climate change initiatives, member appreciation & recruitment, and engagement with other PECG sections.

If elected, I will continue advocating for your rights, fair compensation, and professional growth. I am committed to fostering open communication, promoting transparency, and learning from our diverse membership.

Let's continue building a better organization together and thank you for supporting PECG!
