

2024-2025 SECTION ELECTION CANDIDATE STATEMENT

Vice President At Large: Rinnie Kaur

Classification: Electrical Engineer

Department: California Energy Commission

Years of State Service: 1

PECG Experience: I have grown up staying inspired in a community of PECG engineers leading me to join civil service (state and city). My experience with PECG started when I began volunteering at Caltrans in 2014. Since then I have witnessed and joined the incredible volunteers for the various PECG sections working to represent and promote the interests of engineers like me! Currently, I am learning and working to increase PECG involvement for the new engineers and am really looking forward to connecting with you!

Candidate Statement: Meeting both new, experienced engineers, and other PECG members is exciting to me, because I love hearing about their experiences to learn what matters to them. This is driving me to volunteer for my PECG section office this year. I care and am working towards being more aware, helpful, and learning from membership. My background: I started my career in civil service in 2020. I have worked for Los Angeles Department of Water & Power and I am currently working at the California Energy Commission. Over these years, I worked as an electrical engineer in PV & BESS interconnections and our Energy Commission Efficiency team. I have experience in electrical design work. Currently, I am learning from and working on efficiency and energy code compliance related solutions. Thank you for your time and consideration!
