

PECG Golden Gate Section Report

The Golden Gate Section includes PECG members from "At Large" agencies throughout the San Francisco Bay Area region. This year, we have been especially active with recruitment efforts and have seen increasing membership involvement. Although most of our meetings are still virtual, the Golden Gate Section has three nascent committees:

- **Support for STEM Education** – This is the first year for Golden Gate Section to grant scholarships. We collaborated with the Corporate scholarships program to develop the application process and expect to award up to two students with a \$500 award each.
- **Professional Development** – The Professional Development Committee held its first meeting with six volunteer members to brainstorm how to provide professional licensing resources and career growth opportunities. There was significant interest in organizing exam study groups, skills training, and community events, and we will continue to support these ideas moving forward.
- **Engagement and Recruiting** – We have held our first outdoor socials and look forward to more this summer! Photos below are from the SF Ferry Building and Arthur Mac's Tap & Snack in Oakland.

We hope these initiatives will gain momentum in the coming year as we continue to spur excitement in the Golden Gate Section.
