PECG SUPPORTS SPEAKER'S TRANSPORTATION FUNDING PROPOSAL

SACRAMENTO, Calif. – Today, California State Assembly Speaker Toni G. Atkins unveiled a proposal to provide billions of dollars in much-needed transportation funding over the next five years. The Professional Engineers in California Government (PECG) released this statement in support of the proposal.

“Professional Engineers in California Government applauds Speaker Atkins for her efforts to address our state’s critical transportation funding needs,” said PECG President Roy Flores. “PECG supports the proposal and offers our commitment to work with the Speaker, the Legislature and Governor Brown to generate new transportation revenue in 2015 and for years to come. A significant part of any new funds should be dedicated to maintaining and preserving our state highway system. California deserves a safe, efficient, world-class transportation system.”

PECG represents 13,000 state-employed engineers and related professionals responsible for designing and inspecting California's infrastructure, improving air and water quality, and developing clean energy and green technology.
